To: Lucas Davis <ldavis@haas.berkeley.edu>

Thank you Lucas for the lovely follow-up. I'm glad it was informative. Its hard to know as a speaker what is old and boring vs. new and interesting so tried to at least relay the information in the way I rationalize it in my head.

I'll check out the paper! Always feel free to email or call if you have a question about what's going on.

As always wonderful to see you. Keep up the good work.

Carla,

Sorry I didn't get a chance to say goodbye, but I wanted to thank you for the talk today. I learned a great deal, and it was extremely interesting to get a better sense of the policy questions you are working on. You do an exceptional job speaking to so many different constituencies and I appreciate all of your efforts.

Also, you mentioned the SONGS closure. A recent EI grad, Catie Hausman, and I have a new paper on this. In case you are interested, here is the blog post we wrote about it. <http://energyathaas.wordpress.com/2014/03/31/too-big-to-fail/>

Always good to see you,

Lucas
