

STOP THE POWERLINK PETITION -- CitizensOversight.org

I hereby register my opposition to the Sunrise Powerlink project. Instead, I encourage the adoption of no-wires alternatives, with particular attention to rooftop photovoltaics and other distributed local generation which does not need a massive 500kV transmission line through the sensitive Anza-Borrego Desert State Park or through the southern alternative routes through the Cleveland National Forest and private properties. We are on the verge of an important transition to locally generated solar in sunny San Diego and constructing the Sunrise Powerlink is an outdated solution being deployed at the wrong time.

(Will be provided to the San Diego County Board of Supervisors, to the Governor, State Legislators, and to all CA Representatives and Senators.)
